

POP PICKS ON HOW AS A GOOD LISTENER AS HIS FET HOBBY. PROHIBITION. AND, POOR DEARIE'S EVENING IS SPOILED.

"AND I CALL TO REMEMBER THE TIME WHEN YOU COULD GET TWO FOR A DIME, ETC. ETC."

"HE'S JUST WAKING UP."

"YES! NO! YES! NO! YES!"

"LISTEN! MA'AM - IF YOU'LL TAKE YOUR MAU AWAY I'LL TAKE MINE."

"WHERE DOES SHE GET THAT MAU STUFF?"

"IT'S YOUR MAU'S FAULT FOR LISTENING."

"THAT HARD TALK MAKES DEARIE KICK."

"BRO LOVE AND THE LAW."

"HOW THINGS THAT BY LISTENING - POP'S HARD FACTS' K'LL GET IN SOFT."

"I KNOW HE'LL TALK HIS EAR OFF."

"SPEAKING OF PROHIBITION, THE DEARIE HAS A HARD CASE BY POP."

"(HOO CALLS TO POP A QUESTION) TO DEARIE BUT HAS LISTEN TO A QUESTION BY POP."

"WELL HE CAN SEE HER - BUT DON'T KISS HER - SHE CAN SEE HIM."

"POP'S ALWAYS TALKING TALKING TALKING HIS HAT."

"YES, AND HE TAKES A BRIM FULL."

"IT'S WONDERFUL HOW POP CAN TALK TWO HOURS 'STRAIGHT' ON SUCH A SUBJECT."

"COMEDIAN."

"I THINK YOU'VE SAMPLED SOME OF THAT 'SUBJECT'."

"POP HAS BEEN TALKING TWO HOURS 'STRAIGHT'."

"CIGARS! AUNT HE THE DIZZY BIRD?"

"WHAT WAS IT POP COULD GET TWO FOR A DIME CIGARS?"

"CIGARS! AUNT HE THE DIZZY BIRD?"

"BLUBBER HIS BRAIN IS LIKE A USED CIGAR - ALL BUTT - YOU TELL HIM."

"POP HAS BEEN TALKING TWO HOURS EVENING ALL WET."

EXAMINER'S REVIEW OF PROVINCIAL MARKETS

(Calgary, February 9th.)

Cattle—Beef—Calgary receipts light, but good quality steers Wednesday set the market up, with export grade steers \$6.25 to \$7.25; choice butchers, \$5.25 to \$6.25; good butchers, \$4.00 to \$5.00; medium, \$3.25 to \$3.75; common, \$2.50 to \$3.25. Choice cows and heifers make up to \$5.00, with bulk of lots \$3.50 to \$4.50; good butchers, \$3.00 to \$3.75; medium, \$2.50 to \$3.00; common, \$1.75 to \$2.25; canners down to \$1.00. Calves scarce; tops, \$4.00 to \$5.00; common, \$2.50 to \$4.00. Feeders and stockers—12 to 14 way feeders, \$3.50 to \$4.40; stockers, \$2.75 to \$3.75. Beef—Export steers scarce at Edmonton this week, but choice butchers cattle were in demand and not many offered, which put prices up to \$5.75 to \$6.50, and exporters would bring up to \$7.00; good steers, \$6.25 to \$6.50; medium, \$4.00 to \$4.50; common, down to \$3.00. Choice cows, \$3.50 to \$4.25; good, \$3.00 to \$3.50; medium, \$2.50 to \$3.00; canners, \$1.50 to \$2.00. Choice fat heifers would bring up to \$5.00. Few bulls offered, and tops would bring \$2.50. Calves scarce and hard to quote; best probably \$5.00 to \$7.00; common down to \$3.00 to \$4.00. Demand for feeders good, and best \$3.50 to \$4.50; stockers, \$2.50 to \$3.75. Not much inquiry for stock heifers or cows; stock heifers quoted, \$2.50 to \$3.00; stock cows, \$2.00 to \$2.50.

Hogs—Last weekend and first of this week, hogs in Calgary were down 15c, but Wednesday's prices came up again to \$11.00. Thursday's sales, \$10.75.

Hops—Market at Edmonton holds steady, with Wednesday's price, \$10.75 to \$11.00; top price being for long haul.

Sheep—Market on lambs strong, with choice up to \$5.00, and common down to \$3.25; weathers, \$2.50 to \$3.75; ewes, \$2.50 to \$3.25. Not many in Calgary yards this week.

Sheep—Good demand at Edmonton yards, and receipts light. Lambs, \$8.00 to \$9.50; weathers, \$7.00 to \$7.50; ewes, \$4.50 to \$5.50.

Markets have been good during the past week, and, with maybe a few setbacks, the trade impression is that our wheat is headed to a still better price for the balance of the crop.

LATEST NEWS

The first session of the fifth legislative assembly of Saskatchewan has been prorogued by his honor Lieut. Gov. Newlands.

The final hearing of the board of railway commissioners on the equalization of freight rates between east and west will be made the occasion for a determined drive for lower rates on pulp and lumber from the north country.

The federal and Ontario governments may enter upon a legal battle to ascertain whether the province has a right to license foreign fire insurance companies to do business in Ontario.

The Montreal Le Canada, official organ of French Canadian Liberalism, denounces nationalization of Canadian railways in an editorial, and hits at Hon. James Murdock, minister of labor, and also Hon. Charles Stewart, minister of interior.

Elie LaFortune, of Montreal, charged with manslaughter in connection with the death of J. P. Holland, who died from the effects of an overdose of morphine, has been committed for trial.

The Ontario Milk Producers' association warmly endorses the efforts of the federal department of agriculture to stamp out the tubercular cow.

Peter Shoemaker, a farmer residing near North Bay, Ont., was burned to death in his bed when his home was razed to the ground by fire.

It has been decided to voluntarily establish two brands of cream in Ontario, the difference in price being about three cents per pound of butter fat.

The Standard Fire Assurance company building in Montreal has been destroyed by fire, with damage at approximately \$500,000.

The board of governors of the Royal Victoria hospital in Montreal has approved the donation of 50,000 square feet of land to the Myast Shriners of Nova Scotia for the erection thereof of a hospital for crippled children, to cost \$250,000.

The actual arrival of a reciprocal agreement between U.S. and Canada with regard to dairy products is assured, although no arrangement has actually been consummated, says D'Arcy Scott, secretary and collector of the National Dairy Council.

At the present time there is a market for about 30 Canadian-made motion pictures a year, and if production can be brought to this stage Canada will be exporting about \$4,000,000 worth of pictures annually.

To secure complete Dominion-wide prohibition, "and to take the high place Canada should and may occupy in the world prohibition movement" are two of what the executive of the Ontario branch of the Dominion Alliance terms as the "five big jobs ahead."

The Ontario government will aid any organization of fruit growers in erecting buildings for the grading and packing to the extent of 25 percent of the cost, says Manning Doherty, provincial minister of agriculture.

The return of "Right Hon. Arthur Meighen and Hon. T. A. Cregar from the south is being awaited with interest in Ottawa.

The Nova Scotia house of assembly will meet March 20.

The British Indian police fired on a mob of 10,000 natives during a serious riot at Tiruvannamalai, India, killing three persons and wounding eight others.

The British government has been considering for some time the possibility of enlisting the services of General Smuts, premier of South Africa, as arbitrator in the Ulster boundary dispute.

The Irish Free State bill, destined to put into effect the terms of the Anglo-Irish treaty, has been formally presented to the British House of Commons by Austen Chamberlain, government leader.

Ulster's frontier is virtually a line of steel now, and armed forces of "specials" are being sent to the border line.

DOES IT GET US ANYWHERE?

University Club, Vancouver, February 7th, 1922. The Editor, The News, Red Deer, Alberta.

Sir:—I have read in The News Mr. Brown's weighty sermon on Christian Science. I have also read the rejoinder of Mr. Higgins on behalf of the Christian Scientist, as well as the letter of an anonymous contributor taking Mr. Higgins to task. I wonder if any real good is served by this sort of controversial business. Does it get us anywhere? It certainly gives those who are opposed an opportunity to ventilate their views in the press which they would not otherwise have.

There is an aspect of the matter, a consideration of which should allow any anxiety we may have of the ultimate success of this and other ecclesiastical religious notions. Mr. Upton Sinclair says that Mrs. Mary Baker Eddy is the penalty the United States is paying for having failed to teach her farmers' daughters, just as Billy Sunday is a similar penalty for having not educated her baseball players.

To my mind, he here puts his finger upon a real weakness of our civilization. The reason why religious and other fads have such a rapid and extensive growth in our day is that while our boys and girls are taught in our great schools, they are not taught to think. From many pupils of our land, the people are a great mass of uneducated slaves. I do not believe our age is any more wicked than past ages; indeed, I think just the opposite. We are suffering from today is not so much greater wickedness than our fathers as greater stupidity—just common and garden stupidity.

For that reason I would like to see a closer co-operation between the Church and the School in a sort of loving conspiracy for the welfare of the general public. The school could do much more or less useless studies, or at least devoting less time to rote learning and seeking to aid its pupils in developing the powers of clear thinking, and the Church introducing the Master of thinking men, Jesus Christ.

Yours faithfully,

CHAS. H. HUESTIS.

SHAREHOLDERS OF MERCHANTS BANK RATIFY ABSORPTION

DECISION IS ALMOST A UNANIMOUS ONE

Montreal, February 9.—By an almost unanimous vote of shareholders of the Merchants Bank at a special general meeting held here yesterday afternoon and evening, the proposal that the bank be absorbed by the Bank of Montreal was ratified. The vote stood 76,844 shares in favor of the proposal and 135 shares against.

Under the proposal, two shares of Merchants Bank will be exchanged for one share of Bank of Montreal stock, at \$100.00 in cash, which represents an addition of \$100.00 a share.

Prior to this result, two amendments were placed before the shareholders, and each was voted down. One was by Mr. K. LaFramme, lawyer, whose examination of Sir Montagu Allen, president of the Merchants Bank, formed an outstanding feature of the meeting. It set forth that the shareholders should not approve the proposal unless more information was furnished as to the condition of the affairs of the Merchants Bank and the circumstances under which negotiations with the Bank of Montreal were initiated.

Following a very lengthy questioning by N. K. LaFramme, K.C., and a short one by W. M. Couper, acting for shareholders, the C. Macarow, general manager of the Merchants Bank, made a brief statement saying he had not come with the intention of saying anything, but that in view of the charges made he felt it necessary to speak.

"As to the sale," he said, "Mr. Macarow, 'I have little to say. I am ignorant as to that transaction, and have no information except what has appeared in the press. In my humble opinion, and without imputing any motives to the proposal, in any way, I think the statement of 1921 substantially showed the position of the institution at that time, valuing its assets on that basis."

"As to the statement of the president that the general manager of the local branch had not reported the true position following time-honored practice, the Montreal manager appeared at each meeting of the board and reported what was going on, respecting his instructions in a general way direct from the board."

"I will say without hesitation that I join issue emphatically and unequivocally with what the president has said, with regard to the affairs of the bank, and I consider that the statement is not founded on the facts of the case."

Montreal, February 9.—Among the big losses suffered by the Merchants Bank, whose shareholders last night voted to add it to the Bank of Montreal, was \$2,000,000 in loans to officers of the bank. These loans were for automobiles and houses for officers of the bank and also for purchase of stock and bonds.

This is shown in the report of the examination of the assets of the bank by H. B. MacKintosh, who reports that in some cases the security is deficient, and in a few cases seriously deficient.

The report also shows that the bank's assets are not properly valued, and that the bank's management is not properly supervised.

The report also shows that the bank's management is not properly supervised, and that the bank's assets are not properly valued.

The report also shows that the bank's management is not properly supervised, and that the bank's assets are not properly valued.

WHOLE SOME FOOD —HEALTHY PEOPLE

There is much in the report of the Veterinary Director General for the year 1920-21 that must be very gratifying to Canadian readers. From it we learn that Canadian live stock continues to be in excellent condition, and that the health of the live stock is as good as it has ever been. The reputation as among the healthiest in the world, that none of the great plagues, such as rinderpest, foot-and-mouth disease, and contagious pleuropneumonia, has been allowed to enter the country; that hog cholera and glanders have been so effectively dealt with that losses have become comparatively trifling, and that the health of the live stock is as good as it has ever been.

The annual meeting of the shareholders of the Innisfail Creamery was held at the Town Hall, Innisfail, on Friday last. There was only a small attendance, caused principally by the cold and disagreeable weather.

The president, Mr. Joseph Smith, occupied the chair. The minutes of the last annual meeting were read and approved. These minutes were complete and well written that several of the presenters complimented the Secretary, Mr. Stewart Moore, the way in which the previous meeting was recorded.

The financial report showed a balance on hand of \$17,644, with outstanding cheques amounting to \$8,646, leaving a net balance of \$8,998. As these cheques had been outstanding for several years, and no dividend had been paid, it was resolved to cancel the general account with the amount, thus bringing up the balance on hand to \$270.10.

The chairman briefly recapitulated

No Man Ever Retired on the Money He Spent

If you continue to spend all that you earn, what will your financial position be when you are fifty? Build a prosperous future by saving regularly while you are young. The advancing years are viewed complacently by the man who has a comfortable sum in a Savings Account.

You Can't Expect People To Think You Have A Good Horse If It Wears Poor Harness

Of course, good harness will make a poor horse look, at a quick glance, like a good one.

But that isn't so regrettable as the other fact, that a poor harness—or a part of the harness—will make a good horse look like a poor one, even though it be your horse.

Visit this store and look around—and get it out of your head that you "can't afford" to buy any horse goods just now.

WEDNESDAY, FEBRUARY 15, 1922

THE LOGICAL CENTRE

Even the casual observer must be struck with the fact that recent movements recognize Red Deer as the logical centre for activities affecting this part of the province.

It was no blind chance that led the Indians to camp, and the Galt's horse to establish a store, at the "Old Crossing" many years ago. There was a river at that point, and water is essential to the welfare and comfort of men.

It was not merely the fact that Red Deer is midway between Calgary and Edmonton that led the Canadian Pacific Railway to establish its freight divisional point at Red Deer. There is a river at that point, and water is essential to the operation of steam locomotives as it is to the existence of men.

It was not foolishness and shortsightedness that led people to invest in Red Deer property and enterprises in the past. This is the logical centre of Central Alberta and no amount of delirious of scepticism can frustrate its destiny. It may be delayed; it cannot be denied. The existence of the Red Deer river is positive and its greatest guarantee of the fact.

Within the past few months, at least four distinct movements, emanating almost entirely from without the city, have borne testimony to the future of Red Deer.

The extensive surveys and plans for draining the Red Deer River, a few miles from Red Deer, and diverting other waters into the Red Deer in the vicinity of Rocky Mountain House, look to establishing this as the head of a gigantic irrigation and power system, one of the greatest on the continent. This is a government enterprise that is full of promise for Red Deer.

The organization to push the agitation for building the "S" Line is another significant movement, for which the farmers in the district are served, and they want them by way of Red Deer. These are the signs of progress, and governments will not be allowed to rest comfortably till action is secured.

The story published a few days ago of the extensive plans for developing the dairy industry is another indication. Calgary and Edmonton are recognized as consuming centres for dairy products. These markets must be supplied and the surplus in the adjoining territory must be manufactured.

But just as soon as the position in Central Alberta is reviewed, by the promoters of the scheme, responsible, recognize that Red Deer is the logical centre for the manufacture of dairy products. No wonder that Nelson Smith, M.L.A., predicted that Red Deer should have the most efficient manufacturing plant of the kind in Western Canada. His statement was not real estate propaganda, it was hardheaded reasoning, based on the location, facilities and utilities available here, as not elsewhere in Central Alberta.

The men who ventured to establish the old co-operative creamery here were not shortsighted, although they have been "hard luck" largely as the result of the unusual conditions that have grown out of the war. But we are rapidly returning to normal conditions, and the ideas that these men banked on, several years ago, will soon be recognized as the keystone of success in the dairy industry.

But mark you, Red Deer is the logical centre; with indifference, we may deny, but we cannot deny, the movement.

Not merely in the world of business, but also in the realm of sport. The outflow from sportsmen who have been "hard luck" largely as the result of the unusual conditions that have grown out of the war. But we are rapidly returning to normal conditions, and the ideas that these men banked on, several years ago, will soon be recognized as the keystone of success in the dairy industry.

But mark you, Red Deer is the logical centre; with indifference, we may deny, but we cannot deny, the movement.

Not merely in the world of business, but also in the realm of sport. The outflow from sportsmen who have been "hard luck" largely as the result of the unusual conditions that have grown out of the war. But we are rapidly returning to normal conditions, and the ideas that these men banked on, several years ago, will soon be recognized as the keystone of success in the dairy industry.

THE MUTUAL LIFE OF CANADA

The 62nd Annual Statement of the business of the Mutual Life of Canada has just been published, and the policyholders of the company may well congratulate themselves on the results of the last year's operations.

The statement shows that the surplus earnings have been the largest in the history of the company. Also the little snatches of poetry (by Mrs. Eddy, of course). And when I ask what the C. S. organization is doing to carry out our Master's command to preach the gospel (note the word gospel, His teaching, not His disciples' constructions of it) to every creature, as regards the heathen of other lands, Mr. Higgins dismisses it along with other questions of a blivvian humor and frivolous. Also he seems quite offended about that "Harvesting of the Mind" I should think that a cult who made so much out of the unreality of matter would connect a material object like a harp with a mind.

I would also ask you to note, Mr. Editor, that his Satanist Master frequently uses fine sounding sentiments, truths, etc., to lure people to destruction.

A few extracts from the "little book" that Mrs. Eddy claims was held in the hand of the angel of the apocalypse, viz. "Science and Health."

All in quotations; parentheticals are mine.

"Nothing is real and eternal—nothing is spirit—but God and His idea (meaning Mrs. Eddy's idea). Evil has no reality. It is neither person, place nor thing, but is simply a belief, an illusion of materiality."

"The divine metaphysics of Christian Science, like the method in mathematics, proves the truth of its verities. For example: There is no pain in truth, and no truth in pain; no nerve in mind, and no mind in nerve," etc.

"Christian Science shows that what is termed matter is but the undeveloped state of what is termed by the author mortal mind." (Got that mortal mind.)

"Mrs. Eddy says all these terms matter, the earth, the sun, the stars which we see, she calls mortal mind. Observe how 'mortal mind' is used in various passages.

"In reality there is no mortal mind, and consequently no transference of mortal thought and will power."

"As named in Christian Science, animal magnetism or hypnotism is the specific term for error, or mortal mind." (There being no mortal mind, therefore there is no such thing as mortal mind.)

"Thus it was that I beheld, as never before, the awful unreality called evil."

"Seems demonstrated the power of mortal mind, or body." According to Mrs. Eddy, there are no such things as mortal mind or body, but if anything be demonstrated on nothing.

"You say a bull is painful, but that is impossible, for matter without mind is not painful. The bull simply manifests, through inflammation and swelling, how does it inflame and swell, a belief in pain, and this belief is called a bull." Q.E.D.

"Now administer mentally to your patient a high attention (that is a very, very small amount in a lot of slush) of truth, and it will soon cure the bull. The fact that pain cannot be produced in matter (no mortal mind, no nothing) to feel it is proof that the so-called mind makes its own pain, that its own belief is pain."

In short, a bull is not painful, because mortal mind (which does not exist) is not painful, but it is painful, hence it pains not. Q.E.D.

Query: How can that which exists not cause anything?

"What is termed Science does not exist. It is neither mind nor matter. The belief of evil, which has grown into a terrible strength and influence, is an unconscious error (which does not exist). In the beginning, an embryonic belief without a medium; but afterwards it governs the so-called man."

If disease does not exist, and the belief of sin (which has to do with disease) I cannot see, anyway, this belief is an error; being an error it does not exist. But Mrs. Eddy says: How can that which does not exist govern anything?

"Because the muscles of a blacksmith's arm are strongly developed, it does not follow that exercise has produced this result, for the same used could be weak. It must be the cause of action (what about the arm? It is not the arm, it is the muscles, without volition of mortal mind, could lift the hammer and strike metal, it might be thought true that hammering would enlarge the muscles."

The trip hammer is not increased in size by exercise. Why not? Because muscles are as material as wood and iron? Because nobody believes that mind is productive of such a result on the hammer."

"Muscles are not self-acting. It mind does not move them, they are motionless. Hence the great fact that mind alone enlarges and empowers man through its mandate—'By reason of its demand for and supply of power.' (Both demand and supply? Mind is a vast estimate of its own power.) Because of exercise, but by reason of the blacksmith's faith in exercise, his arm becomes stronger."

Notice that the two minds are brought in; first, and if muscles, mind is not mind, but matter. Hence the great fact that mind alone enlarges and empowers man through its mandate—'By reason of its demand for and supply of power.' (Both demand and supply? Mind is a vast estimate of its own power.) Because of exercise, but by reason of the blacksmith's faith in exercise, his arm becomes stronger."

Mrs. Eddy here proves that mortal mind and Science Mind are the same thing, e.g. do not exist.

It is a strange, a genuine, a hopeless case of disease is induced by a single post mortem examination." That is, an examination after death causes many hopeless illnesses. Mr. Editor, do you wonder people sometimes laugh when they read Mrs. Eddy's work?

All forms of error support the false conclusion that there is more than one life; that material history is as real as spiritual history; that mortal mind (which does not exist) is a conclusively mental as immortal Truth; and that there are two separate worlds, the one of matter and the other of spirit—namely Spirit and matter—resulting in a third person, mortal man, who carries out the mandate of sin, sickness and death. Error does all this, yet Mrs. Eddy says error is nothing.

"During the annual ages, absolute Christian Science may not be achieved, but the change called death, which we have not the power to demonstrate what we do not understand."

Betty Compson
in
J. M. Barrie's Play "THE LITTLE MINISTER"
A Paramount Picture

Rex Theatre, Friday & Saturday

But the human self must be evangelized."

Mrs. Eddy here states that this Mind is not possible till after death, admitting that prior to death we are in a material state, e.g. the human self. Then why all the fuss about error, mortal mathematics, which she says are all the same thing and do not exist. And if they do not exist, why can absolute Christian Science be not achieved before death? Perhaps she means post mortem.

And who witnesses and pain do not exist, why does she devote 75 per cent. of her book to twaddle about them, and a hundred other pages at the back of the book to testimonials, the same as patent medicine ads? Why does she say, 'I am convinced that a citation of facts and truths, as presented by Mr. Brown in the last three issues of The News, cannot fail to be productive of much and lasting good to the entire community.'

This Oil Stove Bakes Bread Perfectly

Not only thousands of housewives, but many nationally respected Domestic Science experts, have tested out this Red Star Oil Stove. Everywhere the verdict is the same—no range of any kind, burning any kind of fuel, can out-cook, out-bake, out-roast or out-fry it. The Red Star at a cost of only a few cents an hour will prepare any kind of dish in your best recipe book in the exact time called for.

This great cooking efficiency is due only to the Red Star Burner, an invention years ahead of its time. This wonderful burner has no wicks—no wick substitutes. It is all metal, weighs 8½ lbs. Makes gas from kerosene, gasoline, etc. Gives two rings of hot blue gas flame instead of one sickly ring. Right up next to the cooking utensil. Burner becomes red-hot, adding more heat. Gives enough heat for any kind of cooking. Uses only one gallon for 19 hours of steady cooking. Saves 25 percent of fuel. Come in and let us demonstrate this new Red Star Oil Stove.

ST. MARGARET'S JERSEYS FOR BOYS AND GIRLS AT LOWER PRICES

Mothers will be pleased to know of the lower prices in these splendid jerseys. We have just received a new shipment, knitted from fine soft yarns with button shoulders. Colors white, cadet, cardinal, brown and navy. Sizes 20 to 32.

Priced \$1.95 to \$3.25

MITCHELL ATTACKS THOSE WHO ABUSE PRESS OF COUNTRY

Gutter Journalism Non-Existent Here.

Edmonton, February 9.—Paying a tribute to the press of Alberta and Canada generally for its uniform fairness in dealing with politicians and political subjects, Charles R. Mitchell, former provincial treasurer, delivered a red hot "roast" in the legislature, Wednesday, afternoon when he spoke of a "report" where the press had been referred to as fighting unfairly and from the gutter.

Hon. George Howland, minister of agriculture, in replying, emphasized the point that the speech was directed against Mr. Wood, by remarking that Mr. Mitchell might as well have to "touch wood" the sun bringing laughter from the gallery.

PRESS OF CANADA CLEAN
Gutter Journalism, Mr. Mitchell explained, in his speech, did not exist in Canada. "But," he said, "when some people come to this country in their middle age, they seem unable to forget the impressions of their youth. I have observed the press in other countries, and I have noticed that it does not give the same space to what is going on in the real life of the people as accurately and as fairly as do the newspapers of Alberta and of Canada."

"I have been disgusted," continued the former provincial treasurer amid an intense silence, "to read in the big city dailies of other countries, spread in big type over the pages, accounts of murders, of assaults, of highway robberies, of divorces, and of wholesale scandal. This is the sort of thing some people may have been accustomed to before they came here, and they still think it is going on."

Mr. Mitchell had prefaced these remarks by saying that he had attempted on the previous day to give a review of beneficial legislation enacted by former governments. "It would have been impossible," he said, "to have accomplished so much if it had not been for the patriotic co-operation of the press, especially during the war and in the years immediately afterwards."

CONSTRUCTIVE SUPPORT
"Though party feelings ran high," said Mr. Mitchell, "the press of Alberta gave the government its constructive support, and I have since the present government took office, that the press has given equally fair support to the administration now in charge of affairs of this province. I believe the press has been, of whomsoever, over the years, it was not unanimous, some differences came from higher feelings than mere bigotry or hate."

Mr. Mitchell then made his reference to the report that the press had been accused of fighting "in the gutter" from the Canadian press to the disadvantage of papers in other countries, the provincial treasurer proceeded further. He recalled that annually, when the Liberal party governments were in power, the U.F.A. executive invariably sent a deputation each year to present to the government the resolutions adopted by the U.F.A. The government had always co-operated and assisted the U.F.A. in obtaining the best legislation to meet their requests.

"You have not had that pleasure of meeting a deputation from the executive," he remarked to the government ministers, then asked, "why?" "Is it the idea," went the former provincial treasurer, "that any resolution which now passes that institution automatically becomes the law of the land? Or is it because all human knowledge is already embodied in the statutes of this province and only slight changes are required to be made?"

KEEPING REASON DARK
Later in the session, Hon. Mr. Howland said that there was a good reason why the U. F. A. resolutions had not been presented to the government, but he did not intend to satisfy Mr. Mitchell by telling him why.

Pursuing his theme of the government issuing from the U.F.A. executive, Mr. Mitchell proceeded: "I sincerely hope we are not going to have a tandem team government with the premier taking all the responsibility and a leader running ahead carrying only a couple of traces and jumping this way and that, with no responsibility while the wheeler has got to take it."

ALL BRITISH BORN
"I believe this government is all right," went on Mr. Mitchell, "apart from the remarks from the government side" and if the government is left to itself that will be the case," continued the former

A Lesson FROM Ancient Rome

Two thousand years ago the athletes and fighting gladiators of the Roman Empire, to ensure speedy healing of wounds, sores and injuries used magical herbal oils and balms.

Taking a lesson from the Ancients, an eminent firm of manufacturing chemists undertook a search to recover these lost secrets. Certain rich herbal oils and essences were at last found and a scientific means of blending and refining them was devised.

After lengthy and costly experiment a super-balm was evolved which contains these potent herbal salts in the most perfect form. To this new discovery was given the name sam-bal, to indicate the highest achievement yet attained in the healing art.

Treatment of skin diseases and injuries has been revolutionized by sam-bal. Its healing and antiseptic power is enhanced by the complete absence of rancid animal fats that distinguish ordinary salves. Eczema, ringworm, ulcers, piles, poisoned wounds, rashes, cold-sores, chaps, chilblains, children's scalp troubles, etc., yield rapidly to sam-bal.

CHAS. SINCLAIR

Jobbing - Estimates, Repairs, etc.
Phone 244 P.O. Box 300

treasurer. "The government will be all right because every one of them are British born. They know that the British idea of a government responsible to the people means. They have been brought up under the British constitution, and Mr. Speaker, unless one has been brought up in a British country it is difficult for them to analyze and to realize just what it does mean."

"I know that when the young are British born. They know that when our government comes to be directed by the younger generation growing up in this country, no matter from what country they or their people come, that when they have been educated and brought up to realize what the British constitution means in responsible government, we will have no need to fear for the safety of our constitutional forms. And I do not then care particularly whether the U.F.A. gets hold of them all, or how great an organization it grows to be."

WEIGHING THE EARTH'S CRUST
That mountain was lighter, cubic yard for cubic yard, than the lying portions of the earth's crust is the conclusion reached as the result of researches conducted by the Division of Geodesy of the United States Coast and Geodetic Survey. It is known that the earth's crust is about sixty miles in thickness, and near that depth, probably below the material of the earth is yielding.

The earth's crust floats on that yielding material. By means of the geodetic observations by the Survey, it has now been discovered that if the earth's crust were cut into solid by vertical planes, with the base of each block at a depth of sixty miles below sea-level, and the area of the bases of these hypothetical blocks would have approximately the same bases.

Dr. William Bowie, Chief of the Division, concluded that there is no tendency for the mountain masses to break down through the earth's crust, as they are not extra loads. They are like the portions of iceberg projecting out of the water which are held up by the ice which is below or in the water. The iceberg floats on, so, he says, does the mountain.

Dr. Bowie also holds that, as mountain systems are in areas which were once very low in elevation, mountains are caused by a swelling of the material in the earth's crust, under them. A lessening of the density of 3 per cent. in a column sixty miles long will elevate an area about 9,000 feet. Such a change in density, due to physical or chemical changes, is within reasonable limits.

PREMATURE OLD AGE
Premature old age is believed to be due to early degeneration of certain glands of the body, notably the thyroid, but premature old-looks is another matter—in large part a matter of habit.

For example, not drinking enough water is one of the "faulty" habits which makes people look old before they should. Many women will drink a cup of tea or coffee for breakfast and then drink but little thereafter because of a fear that water causes fatness.

By drinking water between meals any tendency to obesity will be avoided, while at the same time the tissues of the face will lack the necessary amount of fluids which bring about a contentment look. Instead of lean, haggard, wrinkled and shrivelled.

The lined faces of many young women are frequently due to such lack of water. Their poor complexion is due to poisonous products which are not washed out because of the lack of fluids. Their worried looks are due to nervous tensions because of the deleterious effects of the same poisonous products upon the nervous system.

GLOBE TROTTERS ENJOY WINTER SPORTS

Policyholders of the Mutual Life of Canada Enjoy a Record Year

Unprecedented Profit Earnings

REMARKABLE increase in the surplus earnings of the Mutual Life Assurance Company of Canada was shown by the Fifty-Second Annual Statement, as presented at the Annual Meeting of the policyholders held in the Head Office of the Company at Waterloo, Ontario, on Thursday, February 2nd.

The entire net profits, or Surplus Earnings of the year's operations will be, as usual, ultimately distributed to the policyholders of the Mutual in cash or to the reduction of their premiums or added to the face values of the policies, as per policyholders' individual option. Three factors have combined to bring about this red-letter year in the annals of the Company.

1. Decrease in Expense Ratio

The percentage of the Total Income required for operating expenses was reduced from 20.45% in 1920 to 16.60% in 1921.

2. Increase in Interest Earnings

The average rate of interest earned by the investments of the Company shows an increase from 6.41% in 1920 to 6.60% in 1921.

3. Highly Favorable Mortality

The mortality rate of 1921 was the lightest experienced by the Company in recent years, being relatively 20% less than in 1920.

Surplus Earnings of \$2,243,038, being \$46.47 per \$1,000 of Total Assets

The combined effect of these three different factors in the Company's experience for 1921 was to increase the surplus earnings from \$38.67 per \$1,000 of assets to \$46.47 per \$1,000

Salient Points from the 1921 Report
Income, - - - - \$11,059,484 Assets, - - - - \$48,211,204
Paid to Policyholders, \$3,672,874 Business in Force, - \$228,697,353
General Surplus Funds, - - \$5,790,520.70

VALUE OF SOIL PACKER DOUBTFUL

(Experimental Farms, Note)
Extensive experiments conducted over a period of ten years, on the Dominion Experimental Farms do not show any conclusive advantage to be derived from the use of the soil packer. Experiments have been conducted with surface packers, sub-surface packers and combination packers ploughed and land, on fallow and under ploughing, in increased yields. If these experiments are correct, and they have been conducted without prejudice, it is unwise for farmers to waste time and money with this implement. The question is well worth serious consideration as thousands of farmers are now using the packer very extensively. In order to clearly judge the question, a brief statement may be given regarding the origin of the packer and the theories underlying its use. When the great plains area of Western Canada and the United States began to be settled about 1885, new methods of farming had to be devised from those used in Eastern Canada and the Central and Eastern States. Soil moisture was here the dominant factor and new methods of cropping and new cultural methods were introduced, in the hope of increasing yields. Among these cultural methods was the use of the soil packer, whose introduction may be largely attributed to the work of H. W. Campbell of Lincoln, Nebraska. The theory underlying the use of the soil packer is that its action conserves moisture. By pressing the surface soil against the subsoil uproot capillary movement of moisture is supposed to be established, by leaving the surface rough, the capillary movement is broken and the moisture is prevented from escaping. Another alleged advantage is that a more uniform germination of seed is accomplished. These theories, however, take no account of the fact that the roots of crops usually penetrate from three to four feet in depth, obviously a depth much beyond the

influence of the packer; moreover, the movement of moisture in dry soils cannot be wholly attributed to capillarity, a serious stumbling block to this reasoning. However, no matter how plausible may be the theories, if there are no average results during the last ten years on all the Prairie Experimental Farms with the various types of packers. Within the limits of this article it is impossible to present more detailed statistics.

YIELDS OF WHEAT IN BUSHELS
On summerfallow—Surface packer, 34.4; sub-surface packer, 34.5; combination packer, 34.4. On spring ploughed stubble—Surface packer, 35.8; sub-surface packer, 35.3; combination packer, 35.3; no packer, 24.7.

On fall ploughed stubble—Surface packer, 32.2; sub-surface packer, 32.3; combination packer, 32.5; no packer, 23.2. An examination of these figures shows little difference between packed and unpacked land. Only on spring ploughed stubble did the packer show any advantage, and this is not large enough to warrant the conclusion that it has been due to the packer. Experimental error would easily account for this difference. Moreover, persons interested in this question are invited to write for further information.

F. S. Hopkins,
Dominion Field Husbandman.
C. M. Livingstone, United States consul in Charlottetown, P.E.I., is resigning, and his successor, George G. Brown, of Philadelphia, Pa., is expected to arrive February 14.

The proposal made by L. A. Gareau, of the English and Scotch Woolen Co., to Gordon W. Scott, trustee in bankruptcy, for a composition in satisfaction of his liabilities by paying 50 cents on the dollar for all proved claims, has been given approval in the bankruptcy court in Montreal.

MAGIC BAKING POWDER

Magic Baking Powder has been known and used all over Canada for more than 25 years. It has set and maintained the standard for goods of its class. Its use is increasing daily because of its strength, purity and universal satisfaction. Pure food insures good health. Magic Baking Powder insures pure food.

TORONTO, CANADA

There will be no break between the labor group and the government forces in the coming Ontario legislature over the hydro-electric railway policy. The Ontario government, says Hon. Walter Rolfe, minister of labor.

Team of Huskies for Quebec Visitors

One of the chief innovations at the Chateau Frontenac, Quebec, in connection with the winter sports programme is the introduction of a husky dog team. In order to secure the genuine animal, a representative visited the North Country to select dogs suitable for this purpose. Previous to the journey, telegrams were sent to all important fur posts, north of the Great Lakes, but owing to the unusual conditions prevailing during the fall of 1921, little success was met with. A variety of replies were received, but finally, where they traded them for fresh supplies, beads, firearms, and other articles which they may require. The representative of the Chateau on arrival found some 15 to 20 dog teams, but they were a motley assortment, only a few running true to type. Teams were constantly coming and going, and finally with a burst of speed, a fast young outfit approached the Hudson's Bay Post, and at the command of "Go" from the Indian musher suddenly slowed up and came to a stop. The leader was a particularly young brown wolf-like animal, and was named "Nipmaging," which translated means "Nipmagon Wolf" and after various tests was selected as one of the proposed team. Finally the other four were purchased, as they proved to be one of the fastest teams in that part of the country. Exceptional care was exercised in the selection as they were to be used in the vicinity of the Chateau Frontenac, at Quebec, and naturally were bound to be handled and petted to a certain extent by the guests and spectators. Not having been trained together, considerable trouble was experienced at first. The Indian who assisted in breaking them in said, "Take away the harness and let them make friends." No sooner was this done than a regular pandemonium ensued, followed by a glorious race and tumble fight, and it was with great difficulty they were separated. The Indian merely grinned and said, "They are all friends now," which seemed to be the case, because after a certain amount of sniffing and licking they were again tested and pulled much better. Ten to fifteen miles a day were made by the teams without any individual loafing, and so fast were they that the Indian challenged a number of the other teams around to a series of races, and not once was the new team defeated. At last the animals were shipped by the Canadian Pacific to Quebec City, and arrived in excellent trim. The names of the dogs are somewhat interesting, being all Indian, and are as follows with the English translation: Nipmagingen, Nipmagon Wolf; Wabos, The Rabbit; Wabaska, Whitey; Keego, Fish; Muk, From "Nakwa" meaning bear.

At the age of nine months or one year the education of the husky begins in earnest. He is broken to harness learning, with older dogs, to pull his share of the load. At four years he has attained his full growth and strength, a stalwart wolf-bird, half-wild, disdainful, powerful, perfectly proportioned, and beautifully proportioned. The harness is made of one long, continuous side-trace connected with a saddle, and belly-band around the middles, and to head-collars which rest on fore shoulders and receive each dog's pulling weight. The Indians have particular craft in which to guide or incite the teams. "Mush, Yoyay, Yulok," to coax them into a gallop. Then "Ah . . . Pecu," as some dog slackens in his traces. "Hu, Corni" (leader). If the lead-dog is wanted to turn to the right, or "Chac, Corni, Chac" to the left.

The husky dog has been a valuable servant to the men of the Canadian North, and his part in Northern development has been no small one. His services are still of incalculable worth in the transport of over-manned areas where no other means of travel exist, where the pioneers of civilization and progress are blazing trails, and securing the first fruits of a wealth which only time and the introduction of railroads will fully reveal for exploitation. The mounted police, trappers, miners, prospectors, all men of the snow-shoe trail, gallantly pay their tributes to the part the husky dog plays in their daily work. The district north and west of Nipmagingen, as just before Christmas, the Indians bring their fall teams, and finally with a burst of speed, a fast young outfit approached the Hudson's Bay Post, and at the command of "Go" from the Indian musher suddenly slowed up and came to a stop. The leader was a particularly young brown wolf-like animal, and was named "Nipmaging," which translated means "Nipmagon Wolf" and after various tests was selected as one of the proposed team. Finally the other four were purchased, as they proved to be one of the fastest teams in that part of the country. Exceptional care was exercised in the selection as they were to be used in the vicinity of the Chateau Frontenac, at Quebec, and naturally were bound to be handled and petted to a certain extent by the guests and spectators. Not having been trained together, considerable trouble was experienced at first. The Indian who assisted in breaking them in said, "Take away the harness and let them make friends." No sooner was this done than a regular pandemonium ensued, followed by a glorious race and tumble fight, and it was with great difficulty they were separated. The Indian merely grinned and said, "They are all friends now," which seemed to be the case, because after a certain amount of sniffing and licking they were again tested and pulled much better. Ten to fifteen miles a day were made by the teams without any individual loafing, and so fast were they that the Indian challenged a number of the other teams around to a series of races, and not once was the new team defeated. At last the animals were shipped by the Canadian Pacific to Quebec City, and arrived in excellent trim. The names of the dogs are somewhat interesting, being all Indian, and are as follows with the English translation: Nipmagingen, Nipmagon Wolf; Wabos, The Rabbit; Wabaska, Whitey; Keego, Fish; Muk, From "Nakwa" meaning bear.

M. D. OF HAYES

The eleventh meeting of the Council, was held in Delburne on Friday, January 27th, at 2 o'clock. Present: All Councillors present. The minutes of the previous meeting were read, and on motion of Kirkberg were approved.

As per motion passed at the December meeting, a by-law was presented, and on motion of Robinson it was given the necessary readings and passed.

Moved by Kirkberg, that the Secretary be instructed to notify all those who owe the City and hospital accounts to the effect that unless settlement is made within 60 days from the date of notice a caveat will be filed against the title to any property they may possess. Carried.

In regard to a letter from the Dept. of Municipal Affairs in connection with the Domestic Animals Act, it was moved by Ross that we get more information before taking any action to carry out the provisions of the said Act. Carried.

Re the account from the Memorial Hospital of Red Deer, it was moved by Ross that the Secretary write R. Tarzwell, of Lonsdale, to ascertain if his daughter was a resident of the district at the time she was admitted to the Hospital. Carried.

Moved by Ross, that the Secretary write the Memorial Hospital Board to inform them that we are willing to settle by note for the account less the items in dispute. Carried.

Moved by Kirkberg, that we accept R. Dando's order on V. F. Eaton's account for the sum of \$20.00 and the balance be added on his Hospital account. Carried.

Moved by Ross, that we apply to the Dept. of Public Works to have the following bridges rebuilt, and have a copy of this motion be sent to Mr. Donald Cameron, M.L.A., Innisfail. Carried.

2 20 ft. spans between sections 21 and 23-24-25-26-27-28-29-30-31-32-33-34-35-36-37-38-39-40-41-42-43-44-45-46-47-48-49-50-51-52-53-54-55-56-57-58-59-60-61-62-63-64-65-66-67-68-69-70-71-72-73-74-75-76-77-78-79-80-81-82-83-84-85-86-87-88-89-90-91-92-93-94-95-96-97-98-99-100-101-102-103-104-105-106-107-108-109-110-111-112-113-114-115-116-117-118-119-120-121-122-123-124-125-126-127-128-129-130-131-132-133-134-135-136-137-138-139-140-141-142-143-144-145-146-147-148-149-150-151-152-153-154-155-156-157-158-159-160-161-162-163-164-165-166-167-168-169-170-171-172-173-174-175-176-177-178-179-180-181-182-183-184-185-186-187-188-189-190-191-192-193-194-195-196-197-198-199-200-201-202-203-204-205-206-207-208-209-210-211-212-213-214-215-216-217-218-219-220-221-222-223-224-225-226-227-228-229-230-231-232-233-234-235-236-237-238-239-240-241-242-243-244-245-246-247-248-249-250-251-252-253-254-255-256-257-258-259-260-261-262-263-264-265-266-267-268-269-270-271-272-273-274-275-276-277-278-279-280-281-282-283-284-285-286-287-288-289-290-291-292-293-294-295-296-297-298-299
